SKILLS

Programming Languages

- C#
- C
- C++
- Java
- Python

Frontend Technologies

- HTML
- CSS
- Bootstrap
- JavaScript
- Typescript

Databases

- Microsoft SQL Server

Frameworks

- ASP.NET Core
- Angular
- ASP.NET with MVC
- React
- Bootstrap

Version Control

- GIT
- GITHUB

TRAINING

Microsoft & freeCodeCamp Foundational C# Certification

DevSkill (May 2023 – Sept 2023)
[Professional Programming with C#](#)

DevSkill (May 2023 – Sept 2023)
Full Stack ASP.NET Core MVC
Web Development

EDUCATION

BSc in Computer Science and
Engineering
East Delta University

EXTRA CURRICULAR ACTIVITIES

Coordinator
EDU Computer Club

PROFILE

As a Full-Stack Software Engineer, I specialize in building robust web applications with seamless performance and user-centric design. Proficient in ASP.NET Core for scalable backend architecture and Angular for dynamic frontends, I deliver solutions that align with industry standards and enhance user experiences. Driven by a passion for innovation, I'm exploring AI to solve real-world challenges and create impactful, data-driven applications.

EXPERIENCE

Intern Software Engineer

Chattogram, Bangladesh
May 2024 – Sept 2024

NeuroStrom

Full Ownership of Admin Module: Led the development of the SoowGood Platform Admin Module, managing both frontend and backend development independently after the departure of a senior team member.

Backend Expertise: Designed and implemented full-phase backend APIs in ASP.NET Web API, establishing complex business logic and ensuring secure, high-performance data flow.

Database Design: Architected scalable and efficient database solutions in Microsoft SQL Server, aligning with the platform's business requirements and logic.

Frontend Development: Built a responsive, user-friendly admin interface using Angular, Angular Material, and Reactive Forms, enhancing the administrative experience.

Bug Resolution and Maintenance: Resolved critical bugs in the system, ensuring the stability and reliability of the platform during crucial development phases.

End-to-End Responsibility: Blended backend precision with frontend innovation, driving the platform's efficiency and ensuring a seamless experience for users and administrators.

PROJECTS

CommUnityApp

- Developed a web application using .NET 8 and Entity Framework Core
- Implemented API creation, JWT authentication, and real-time notifications with SignalR
- Integrated cloud storage and managed error handling
- Built front-end using Angular (v17)

MagicVillaAPI

- Completed project on building RESTful APIs using .NET 7.
- Designed best practices for API design, including proper HTTP method usage and status codes.
- Implemented API documentation, versioning, and security principles.
- Applied knowledge to create a functional API project, demonstrating proficiency in modern web development techniques.

NZWalks

- Developed a full-stack web application utilizing .NET 8 and Entity Framework Core for robust backend functionality.
- Implemented RESTful APIs, JWT authentication for secure access, and real-time notifications using SignalR..
- Integrated cloud storage solutions and streamlined comprehensive error handling processes.
- Demonstrated proficiency in API development and web services through the creation of a fully functional API.
